

AECC Access to Higher Education Diploma: Health Sciences

Recommended Textbooks

We understand that returning to education can be an anxious as well as an exciting time for you and we know that many students will want to prepare for the Access Diploma by purchasing and reading textbooks on relevant subject areas.

We recommend a variety of textbooks throughout the Diploma, all of which are available in the AECC library but many of these you do not necessarily need to buy to complete the course and some may not be applicable to university study. Therefore we have put together a short list of recommended textbooks that, if you wish to purchase, will help you not only on this Diploma but at university as well.

- Cottrell, S (2013). The Study Skills Handbook. Palgrave Macmillan.
- Tortora, G.J. and Derrickson, B., 2014. Principles of Anatomy and Physiology. 14th ed. New Jersey: John Wiley and Sons. *(You can purchase older editions of this book and the content is the same. If you want access to the online resources you will need to buy a new book with a new online code)*
- Foulder, D. 2015. WJEC/Eduqas Biology Student Guide 1: Unit 1: Basic biochemistry and cell organisation (WJEC Biology Student Guide 1). Phillip Alan.
